LOGISTICS

OUR MISSION & VISION

VISION

To be a business partner for logistics and supply chain in the field of sustainability with our customers by offering a better, sustainable and value-added service with a reliable, high quality and continuous development philosophy.

MISSION

To become a leading company that offers its customers a wide range of transport services by achieving brand recognition in the international market and contributing to society.

OUR VALUES

- To be customer-oriented and reliable and always honest
- To create added value for its employees, business partners, industry and society
- Make a difference in the marketplace with high quality, fast, solution-generating service and competitive pricing
- Making life easier through the most effective use of technology
- Maximize employee satisfaction by taking into account their expectations
- To focus on the solutions with team spirit and personal responsibility and to share the success
- Conduct activities in accordance with legal and ethical rules

We are a logistics company that provides road services throughout Europe with our own fleet of vehicles. Our main routes are: Germany, Belgium, Netherlands, France, Italy, Spain, England, Poland, Czech Republic, Romania and Scandinavian countries. For your import and export shipments we have partial departures every day from Tuesday. All our vehicles are planned as direct road and double driver, so we offer our customers serious advantages in transport time.

The fact that more than 80% of our country's foreign trade is carried out by sea is a very important task for sea transport. As POINT Logistics, we offer services to best execute and manage this mission and provide internationally effective logistics solutions. We dock at all ports in the world. Our company, which has achieved successful logistics solutions through its membership in the World Forwarders Association FIATA and UTIKAD, has agencies around the world and all the services required for sea transport.

With our widespread agency network and our logistics centres at strategically important points abroad, we offer our customers an efficient and high-quality flight service with the most economical approach.
